WORK HISTORY

Freelance Full-Stack Developer

Personal & Academic Projects • Bahir Dar, Ethiopia • 2022 – Present

- Built **StudyHive**, a complete study collaboration platform using React, Node.js and MySQL that enabled real-time resource sharing and student interaction.
- Engineered a real-time **Multi-User Chat Application** using Java, JavaFX and MySQL, incorporating authentication, live messaging, file transfer, and multi-threaded server architecture.
- Developed **FixItNow**, a service marketplace connecting users with providers. Designed responsive interfaces and full backend logic for service listings, booking requests, and user accounts.

- Created **GibiShop**, a modern e-commerce web application featuring product catalog, shopping cart, and complete user management system with backend operations for products and orders.
